

**PhD: BONE BIOLOGY - SECOND SEMESTER SCHEDULE**

**SUBJECTS:** Functional Human Osteology and Bone Aging & Bone Pathology and Bone Imaging Techniques

**Date and time:** po dogovoru kandidata sa predavačima

	<b>Subject</b>	<b>Hours</b>
<b>M. Đurić</b>	Bone structure	2
<b>M. Đurić</b>	Joints – functional anatomy	1
<b>D. Hrnčić</b>	Bone and joint physiology	2
<b>A. Janović</b>	Bone X-ray	3
<b>T. Pekmezović</b>	Epidemiology of infectious diseases involving skeleton	9
<b>M. Đurić</b>	Bone remodeling cycle Bone mechanical adaptation	3
<b>P. Milovanović</b>	Methods for evaluation of bone microstructure and composition	2
	Bone - polarizing microscopy, SEM, TEM	2
<b>J. Sopta</b>	Cell cycle	2
	Carcinogenesis and carcinogenic agents	2
	Biology of tumor growth; Host defense against tumors: tumor immunity	2
<b>S. Spremović</b>	Aging - changes of reproductive organs, and the reflection on the skeletal system	2
<b>B. Štimec On-line</b>	Blood supply of bones and joints	2
<b>M. Petakov</b>	Osteoporosis, calcium homeostasis and hormonal control	2
<b>J. Sopta</b>	Techniques in diagnostic bone pathology	2
	Metabolic bone diseases	2
	Bone tumors: cytology, pathology & correlation. Possibilities and limitations of pathology	6
<b>N. Petronijević</b>	Introduction to bone mechanotransduction	2
<b>M. Đurić</b>	Selection of topics for the final presentations	1

<b>A. Janović</b>	OPT, CT skull	3
<b>M. Ivović</b>	Osteodensitometry	1
<b>P. Milovanović</b>	Nerve supply of bones and joints	2
<b>S. Despotović</b>	Aging	2
<b>R. Maksimović</b>	Bone MR, CT	2
<b>V. Artiko</b>	Bone PET, bone scintigraphy	2
<b>D. Đonić</b>	Bone changes in chronic diseases	2
<b>M. Đurić</b>	Final presentations	3
